

7

Mechanical & Electrical Drives

Mechanical assist can be installed initially or added later. Three gear ratios are available to move any size load. Electrical systems eliminate any physical effort to move an aisle and can provide security and connectivity while delivering a cleaner look.

8

Optional Ramp or Deck

Eliminates tripping hazards caused by elevated tracks. With ramp and or deck in place our system provides safety for employees, in addition to cart and rolling ladder accessibility.

9

Quality Control

All of our systems go through 3 checkpoints at the factory to ensure the highest quality possible. Your system will work trouble free, guaranteed with a...

10 Reasons Why Your Dispensary Needs MMI

NATIONWIDE SERVICE

1

From Design to Install

We can design the entire stockroom or quote from your drawings, it's up to you! We can supply all of your stockroom equipment from shelving to lockers, manager's desks and safes. We are your one stop shop for back of house needs!

2

Heavy-Duty Carriage Standard

Larger wheels handle more weight. Our standard wheel has a 50% higher capacity than all other aluminum systems. Which wheel would you rather have rolling under the weight of your inventory?

3

Continuous Riding Surface

Our insert is the riding surface for the wheel and because it is installed in the field it is continuous! When other systems do not use a continuous riding surface, this may cause binding or wheel failure.

4

Smooth Carriage Movement

Cross braces and guide wheels eliminate carriage "racking" which can cause binding and undue stress - especially with longer carriages.

5

Osha Compliant Positive Stop

Our patented foot brake completely eliminates unwanted system movement. Safety concerns are a thing of the past!

6

Integrated Track Sweeps

Tracks are kept clean and free of debris that can impair system movement or cause wheel failure.
